EXPERIENCE

Avatar Global (Web Developer)   March 2024 – Present

I was part of the development team focused on scalable e-commerce projects.

Technologies: JQuery | Java | HCL Commerce | Salesforce Commerce Cloud

- I developed new requirements that allowed greater adaptability of the platforms to the needs of users while maintaining a defined scheme in the development.
- I refactored important system modules, improving stability and reducing the number of problems reported by users.
- Provided ongoing support to existing functionalities, ensuring that issues were identified and resolved efficiently and proactively.
- Participated in continuous training programs on new technologies, helping to incorporate tools that improved team productivity and development performance.

Dasser Innovating Solutions S.A.C (Full Stack Developer)   January 2023 – July 2023

I was part of the development team focused on web applications for national and international clients, participating in projects such as mining management systems, metallurgy management and financial cooperatives.

Technologies: Angular | Typescript | JQuery | Bootstrap | ASP .NET | SQL Server

- I refactored critical parts of the code, applying good clean architecture practices, which resulted in a significant improvement in the maintainability and performance of the application.
- I identified and optimized components whose performance was affecting the user experience, achieving a notable improvement in response times.
- Developed scalable functionalities that allowed clients to handle higher volumes of data without compromising the overall performance of the application.
- Implemented automation scripts in the database, optimizing data collection processes and improving query efficiency.

EDUCATION

National University of Santa – Systems and Computer Engineering   April 2019 – January 2024

- I learned the necessary concepts to specialize in the different areas of computer science.
- I developed soft skills of communication and emotional intelligence.
- I developed projects in different areas (web, networks, desktop, mobile, security, etc).

Udemy Academy – Web Development   April 2020 – April 2022

- I improved my programming skills focused on the web environment.
- I completed intermediate and advanced knowledge of Javascript.
- I improved my knowledge about architectures and backend development.

PROJECTS

Internet Banking - La Portuaria Savings and Credit Cooperative (Dasser Innovating Solutions S.A.C)

- I implemented a large part of the transfers module, ensuring the security of transactions and a user-friendly interface.
- Developed the registration and login module for new users, ensuring a fluid and secure integration with the backend.
- I implemented the administrative configurations module to manage system parameters and operational preferences, facilitating internal control.
- I developed the user administration functionality, credit requests, admission requests, notifications.

Management System - Salaverry International Terminal (Dasser Innovating Solutions S.A.C)

- Updated critical system functionalities by replacing obsolete libraries with newer and more supported technologies, improving long-term stability and performance.
- Identified and resolved problems in management modules after a migration to new technologies, ensuring continuous operation without interruptions in system operations.
- Implemented new requirements requested by users, improving the user experience and ensuring that the system is flexible and adaptable to future operational changes.

Foodius (Personal project)   [Link here](#)

- I consumed a public api to get the information displayed in the application.
- I developed abstractions to handle the use of external libraries.
- Implemented firebase authentication to secure login through providers such as Google.

Windbnb (Personal project)   [Link here](#)

- I developed the components in a granular way to achieve reusability.
- I used CSS modules to handle the encryption of the classes in the components.
- I optimized the filtering of information using path parameters.

ADDITIONAL INFORMATION

Programming Languages

- Java
- Javascript / Typescript
- C#

Technologies

- React
- Angular
- HCL Commerce
- Node

- Spring
- ASP .NET Core
- Salesforce Commerce Cloud
- GraphQL

- MySQL – SQL Server
- Git
- JQuery
